Nick A new field called necroboitics, turning dead spiders into tools,
Developed a liquid to maintain organs to keep them from decaying. For transplants

Susan R Pigs restoring blood circulation a full hour postmortem, keeping cells functioning beyond death. For transplants.

Lynn Maners Moment of science: Remember when fossil footprints were found at White Sands in New Mexico? Recently two archaeologists were doing a site survey on a military testing range in Idaho. One had seen fossil footprints, the other had not. The one who had not asked how to identify them, were they like that depression over there? As it turned out, that was the first of a set of 88 fossil footprints eventually uncovered.

Eylat: Monkeypox, a little bit better than ticks and spiders...it has been declared an emergency, and educate yourself. Be careful.

Tim Griffin: Quick summary to a PhD marine biologist about a song of his
